

PLEYEL

MAGISTRAL SYSTEM

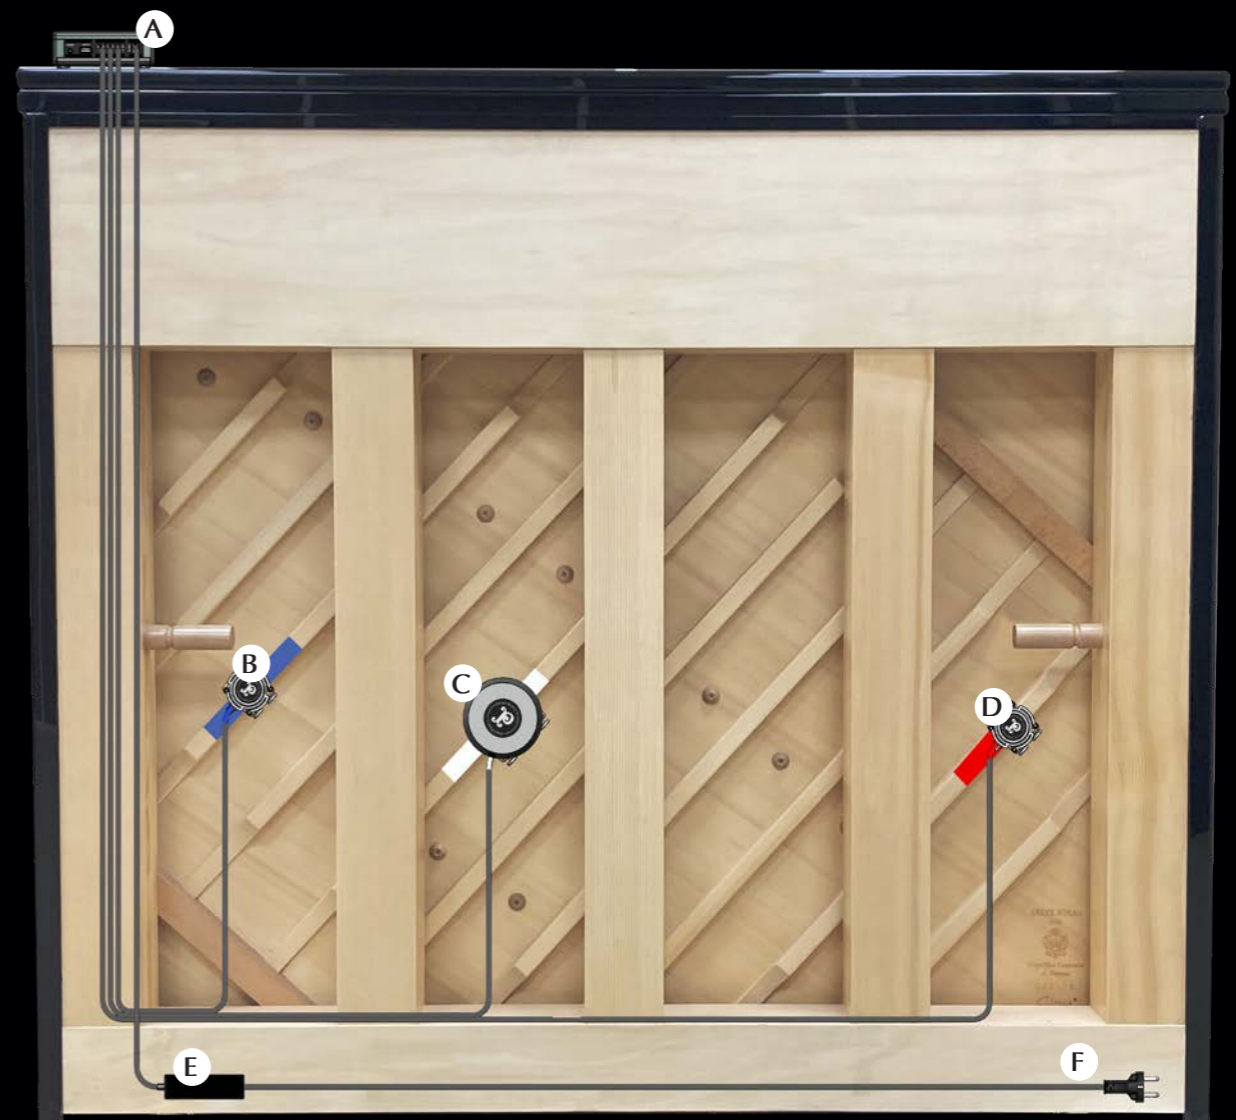

TRANSFORM YOUR PIANO into a top-of-the-range connected speaker in just a few minutes, whatever the brand

Thanks to the Magistral system, the piano's soundboard perfectly reproduces the natural sound and harmonic richness of instruments and voices.

The control box is simply placed on top of the piano. The adjustable brackets allow the transducers to be positioned and fixed to the soundboard bars on the back of your piano, without the need to drill any holes. These brackets are designed to fit the vast majority of upright pianos, new or old, of all makes.

The Magistral System includes:

A Control Box

The ON/VOL potentiometer lets you switch on the system and adjust the output volume. Thanks to the three adjustment potentiometers, you can easily adapt the different treble, midrange and bass frequencies to suit your listening style.

Finally, the multifunction knob lets you change modes (BT/AUX/USB), start playback, pause playback and skip to the next or previous track.

In addition to Bluetooth, the AUX-IN and USB-IN outputs let you enjoy a variety of sound sources.

Fitted with a mounting bracket, each of the three transducers will adapt perfectly to the size of the majority of soundboards on all makes of upright piano. Placed perfectly, they will offer you a complete sound palette.

- B** Right transducer
- C** Bass transducer
- D** Left transducer
- E** Power adapter
- F** Power cable

What's more, if your piano is equipped with a silent system, the Magistral will amplify it.

STREAM YOUR MUSIC

with exceptional sound quality

You can stream your favourite music by connecting via Bluetooth or by cable thanks to the USB and AUX sockets. You'll enjoy all the benefits of a traditional loudspeaker, with exceptional depth and clarity of sound.

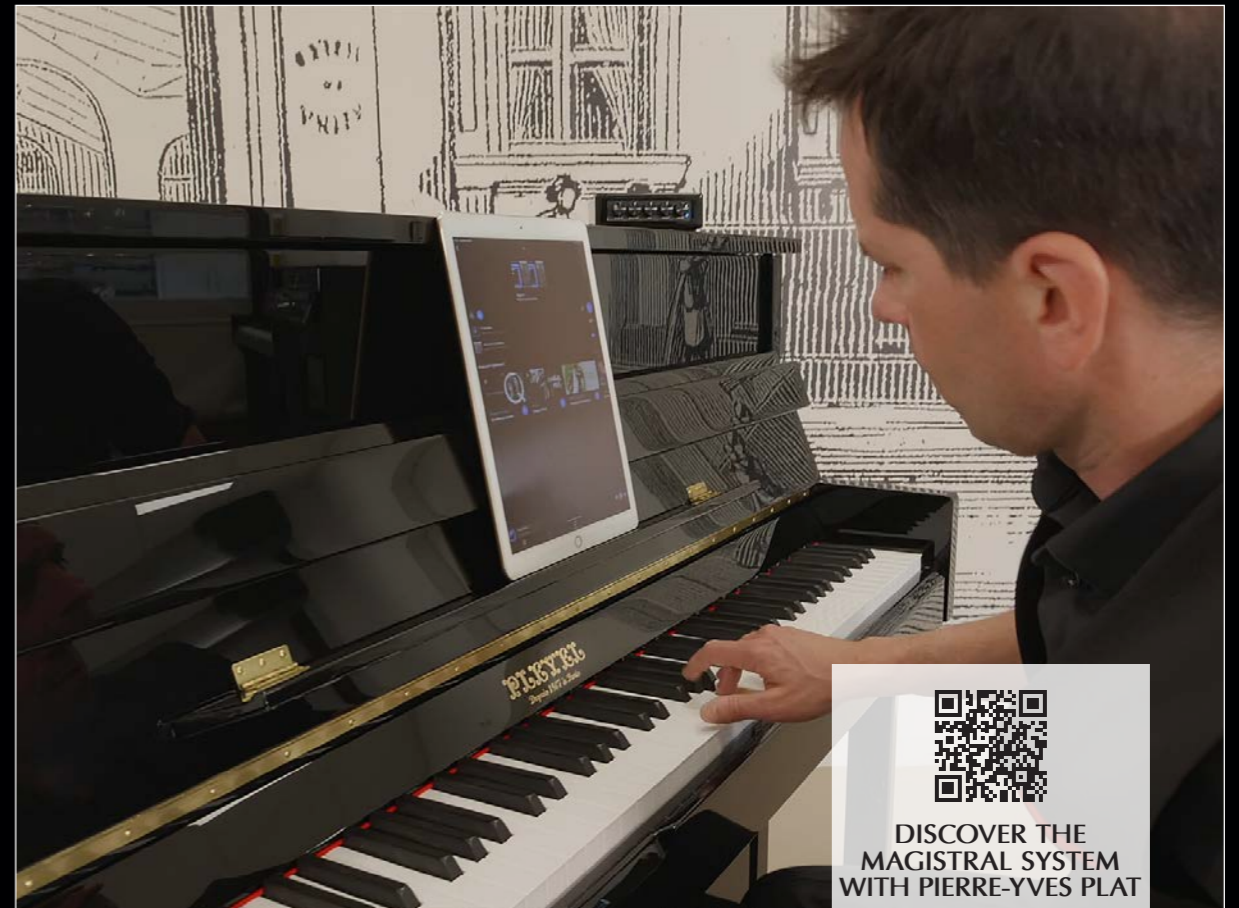

Your old upright piano is unplayable? Give it a second life.

If its soundboard hasn't suffered from the ravages of time, it can accommodate the transducers of the Magistral system thanks to the universal mounting brackets. The complete system installation takes just a few minutes, meaning it won't alter the instrument. Your family piano is thus transformed into a connected speaker, to play your favorite music with extraordinary sound quality.

ACCOMPANY

YOUR FAVOURITE ARTISTS

by playing your favourite tracks

You can play the piano to your favourite playlists, completely immersed in the music of a band.

You can also amplify the sounds of your silent system and mix them with the acoustic sound of the piano.

The Magistral Installation System can be installed under the keybed by an authorised dealer, just like a silent system.

BECOME THE SOLOIST OF THE ORCHESTRA

Practice, progress and play along to interactive scores thanks to the many accompaniment apps available on Apple Store or Google Play, such as Metronaut.

ACCOMPANY YOU

with high-quality recordings
thanks to the Metronaut

For the purchase of a Magistral System, Pleyel offers you a
FREE ACCESS FOR 3 MONTHS
to the full Metronaut application catalogue.

A fantastic teaching tool!

Browse through over 10,000 scores recorded in the studio by professional musicians. This evolving application lets you progress at your own pace. Adapt the tempo, annotate your scores, record yourself... there are so many options to help you learn or improve. You can choose to play solo, in duet, four-handed or accompanied by an orchestra. The Magistral System offers total immersion and exceptional sound quality.
